### Quality Management System FOREWORD

Doc Ref No.:	BPI-QMS-DMT-QM1
Effective Date:	February 7, 2024
Revision No.:	6
Page No.:	1 of 1

The Bureau of Plant Industry (BPI) is one of the agencies under the Department of Agriculture committed to serve its stakeholders through ensuring availability of high-quality seeds and planting materials, generating innovative farming technologies, managing pests and diseases, preventing the introduction and spread of quarantine pests, and ensuring food safety. These mandates are covered by legislations such as Republic Acts, Executive Orders, and Letter of Instructions. Further, the Bureau is always aware of the dynamics of its local and international environment and craft plans and programs to proactively respond to new opportunities and challenges.

Conscious of the call for transparency and good governance, the BPI partnered with the Development Academy of the Philippines (DAP) to develop its management system that is certifiable to ISO 9001: 2015 Quality Management System. This is one of the many efforts we are taking to improve our service to our stakeholders and lead the Philippine Plant industry to sustainable improvement.

As the Director of the Bureau of Plant Industry, the undersigned seek the utmost cooperation of all employees to comply with these quality management systems. We envision this as our humble contribution to the rich history of the Bureau and hope that this will be our blueprint that we will leave to the generation of BPI employees who will come after us.

God bless us all.

GERALD GLENN F. PANGANIBAN, Ph.D.

BPI Director/QMS Leader

#### **OBJECTIVES OF THE QUALITY MANUAL**

Doc Ref No.:	BPI-QMS-DMT-QM1
Effective Date:	February 7, 2024
Revision No.:	6
Page No.:	1 of 1

The revised Quality Management System (QMS) Manual was prepared by the BPI QMS Team and led by the QMS Leader.

This Manual will be used by the BPI as it continues to comply with the requirements of ISO 9001:2015.

This Manual aims to:

- 1. Document the quality management system of the BPI;
- 2. Communicate throughout the organization and its stakeholders BPI's policies and total commitment to quality;
- 3. Provide a guide for the BPI Management, Internal Audit Team and Bureau personnel, in general;
- 4. Assure stakeholders and partners of the Bureau's commitment and capability to respond to their needs and standards;
- 5. Ensures BPI's adherence to the highest form of transparency and good governance.

This Bureau of Plant Industry (BPI) Quality Management System (QMS) Manual defines and clarifies policies, systems, and procedures adopted to implement and continually improve the QMS of the BPI.

This QMS Manual, together with associated documents mentioned hereto, aims to:

- Describe the basic elements of the QMS of BPI and serve as reference in its implementation and continual improvement;
- Inform the internal and external stakeholders and enable them to observe and implement the QMS that is being maintained at the BPI;
- Serve as reference and guide for newly-hired personnel in order for them to be familiar and appreciate the BPI QMS;
- Involve its entire human resources in the implementation of QMS and good governance;
   and
- Continually improve BPI's QMS through an effective feedback system from its internal and external environment and quality audit.

BPI shall review its quality policies and objectives at least once a year to keep them attuned with the present and future requirements of the stakeholders. A monitoring and evaluation system of its QMS shall be institutionalized to ensure that BPI's quality policy is upheld, maintained, implemented, and improved if needed.

This Manual is intended to be used by the six (6) Technical Divisions based in Manila, five (5) National Crop Research Development and Production Support Centers (Los Baños, Laguna, Guisad, Baguio City, Bago Oshiro, Davao City, Jordan, Guimaras, and La Granja, La Carlota City), five (5) Regional Laboratories of the National Seed Quality Control Services (Guisad, Baguio City, Los Baños, Laguna, Jaro, Iloilo City, La Granja, La Carlota City, and Bago Oshiro, Davao City), four (4) National Plant Quarantine Stations (Los Baños, Laguna, Parola, Iloilo City, Bacolod City, Negros Occidental, and Sasa, Davao City), two (2) Satellite Pesticide Analytical Laboratories (Guisad, Baguio City, and Bago Oshiro, Davao City), and the Administrative and Support Offices of the Bureau of Plant Industry.

#### A. History

The Bureau of Plant Industry (BPI) was created from the Bureau of Agriculture on January 1, 1930, by virtue of Republic Act No. 3639 of the Philippine Legislature. The said Act defines the powers and functions of BPI taking over the task on plant research and crop production.

Upon the promulgation of Republic Act No. 4007 known as the "Reorganization Law of 1932", BPI was re-organized to consist of the following divisions: Administrative, Plant Investigation, Agricultural Extension, Plant Sanitation, and Plant Propagation.

General Memorandum Order No. 186, issued by the Secretary of Agriculture and Commerce merged the Home Economics Division of the Bureau of Science and the Agricultural Chemistry Section of BPI to form the plant utilization division on August 1, 1936.

Reorganization Plan No. 30-A, as implemented by Executive Order No. 216 created the Research Division and renamed the Plant Pest and Disease Control Division to Pest and Disease Control Division on January 6, 1957. The Production Division was also created to handle the planning and programming of seed production and propagation, along with the Laboratory Services Division which is responsible for providing common laboratory services and undertaking research on the utilization of plant products.

A new division, Crop Development Services was later renamed as Field Trial Services by virtue of Presidential Decree No. 1050 dated January 1, 1977.

The Pesticide Analytical Laboratory was created as one of the sections under the Crop Protection Division through a Special Order from the Office of the Minister of Agriculture in 1978.

Executive Order No. 116, signed by then President Corazon C. Aquino in 1986 placed BPI under the Production Group and made BPI as one of the Staff Bureaus from its former function as a Line Bureau. The BPI shall be responsible for the production planning of improved planting materials; protection of agricultural crops from pests and diseases; development and improvement of farm equipment and other related structures to the plant industry; preparation of a program for the selection, production, and certification of improved planting materials, as well as guidelines for its implementation; recommendation

of plant quarantine policies; and prescription of rules and regulations for the prevention, control, and eradication of pests, diseases, and injuries to plants and plant products. For its own sector, BPI shall be responsible for the recommendation of plans, programs, policies, rules, and regulations to the Minister of Agriculture and provide technical assistance in its implementation.

The National Seed Industry Council was created with BPI Director as the Executive Director through Republic Act No. 7038, also known as the Seed Industry Development Act of 1992. The Council Secretariat was likewise established to provide administrative and other support services to the Council, which is placed under the supervision of the Executive Director. Further, the Seed Quality Control Section under the Crop Production Division was constituted as the National Seed Quality Control Services (NSQCS). The NSQCS shall have control and supervision over existing field inspection and control services and seed testing laboratories established throughout the country.

Executive Order No. 366 of 2013, otherwise known as "Reorganization Plan of the Government Sector" created two divisions namely: Crop Research and Production Support Division (CRPSD) and Plant Product Safety Services Division (PPSSD). The CRPSD is mandated to develop crop farming technologies which aims to increase farmer's productivity, conserve and utilize plant genetic resources, and ensure availability of quality seeds and plant materials. It merged the former Crop Research and Crop Production Support Division. On the other hand, PPSSD is created to ensure plant product safety for fresh and minimally processed agricultural produce through formulation of food safety protocols and monitor for compliance with food safety schemes as supported by its laboratory activities.

Upon signing of RA 11203 or "An Act Liberalizing the Importation, Exportation and Trading of Rice, lifting for the Purpose the Quantitative Import Restriction on Rice, and for Other Purposes", the food safety functions of the National Food Authority (NFA) was transferred to BPI on March 2019.

#### C. Vision

The BPI is a world- class, resilient and collaborative public sector organization continuously innovating to lead the development of the Philippine plant industry by 2030.

#### D. Mission

"We collaborate with the plant industry stakeholders to ensure the availability of high quality seeds and advanced farming technologies, maintain the safety and integrity of plant food and support the export industry through proactive biosecurity."

#### E. Core Values (SPICE IT)

- <u>Service</u> orientation: BPI is proactive who values its clients.
- <u>Professionalism</u>: BPI is competent abiding by the government's Code of Ethics. BPI is fair and just in the delivery of its services to its clients and personnel.
- Integrity: BPI is transparent, honest, and accountable for its action.
- <u>Commitment</u>: BPI works with passion and commitment.
- Excellence: BPI produces the best results.
- Innovation: BPI finds new solutions.
- <u>Teamwork</u>: BPI exercises partnership and camaraderie.

#### **B.** Functional Descriptions

#### I. Office of the Director

#### • Functions:

- 1. Leads and supervises the overall operations of the Bureau;
- 2. Sets directions, targets, operational policies and causes the effective and efficient execution of the same:
- 3. Acts on administrative, financial and technical concerns that require the approval of the head of agency;
- 4. Recommends policies and procedures, rules and regulations to the Department of Agriculture;
- 5. Issues orders concerning the transfer, assignment, designation, or appointment of personnel of the Bureau;
- 6. Establishes internal and external linkages or environment affecting the Bureau; and
- 7. Performs other tasks assigned by the Department of Agriculture Secretary.

#### b. Assistant Director's Office for Research, Development, and Production Support Services

#### • <u>Functions</u>:

- 1. Supervises the formulation of programs, provide strategic direction and oversees the planning of programs, projects and activities on research and development, crop pest management, crop production support and agricultural engineering research and services in support to BPI's mandate;
- 2. Supervises the implementation of programs, projects and activities on research and development, crop pest management, crop production support and agricultural engineering research and services in support to BPI's mandate, including national and special projects and ensure that targets are met within the prescribed period; and
- 3. Performs other functions, duties, and responsibilities inherent to the designation and such others as directed by the BPI Director and the DA Secretary.

#### c. Office of the Assistant Director for Regulatory Services

#### • <u>Functions</u>:

- Supervises the formulation and implementation of policies, provide strategic direction, and oversee the planning of programs, projects and activities of the regulatory services of the Bureau such as plant product safety, seed quality control, plant quarantine, seed variety registration, plant variety protection and biosafety;
- 2. Leads and supervises over the following BPI divisions and units
  - a. National Plant Quarantine Services Division (NPQSD)
  - b. Plant Product Safety Services Division (PPSSD)
  - c. National Seed Quality Control Services (NSQCS)
  - d. National Seed Industry Council (NSIC)
  - e. Plant Variety Protection Office (PVPO)
  - f. Biotechnology Office (Biotech); and
- 3. Performs the functions, duties and responsibilities inherent to the designation and such others as directed by the BPI Director and the DA Secretary.

#### d. Biotechnology Office

#### • Functions:

- 1. Supervise activities relevant to the implementation of the DOST-DA-DENR-DOH-DILG JDC No.1, Series of 2021;
- 2. Facilitate the processing of genetically-modified (GM) crop applications and issuance of Biosafety Permit for field trial, commercial propagation, and direct use for food and feed or for processing;
- 3. Coordinate with other relevant government agencies in the conduct of safety assessment for GM crop application;
- 4. Ensure compliance of the permit holder to biosafety conditions through monitoring of activities relevant to the application; and
- 5. Resolve issues pertaining to biotechnology matters within the purview of the Bureau

#### e. National Seed Industry Council - Plant Variety Protection Office (NSIC-PVPO)

- <u>Vision</u>: NSIC-PVP is a well-organized and efficient registration and protection services geared towards the development of the Philippine seed industry.
- <u>Mission</u>: We promote and implement policies on crop variety registration and protection to support the acceleration and development of the seed industry.

#### • NSIC Function:

1. The Council shall have a Secretariat which shall furnish the necessary administration, secretarial, and other support services to the Council. The Council replaced the Philippine Seed Board (the body then known to be responsible for the approval and registration of crop varieties).

#### • PVPO Functions:

- 1. Receive and conduct examination of applications for plant variety protection;
- 2. Receive petitions for compulsory license for transmittal to the Board; and
- 3. Maintain a systematic record of all Certificates of Plant Variety Protection, a database of existing plant varieties collected from both local and foreign sources, and samples of the propagating materials of the protected variety.

#### f. Planning and Management Office (PMO)

#### • <u>Functions</u>:

- 1. Lead in the preparation of Annual Work and Financial Plan (WFP) in accordance with approved policies;
- 2. Assist in preparing, reviewing, and consolidating of plans and budget in coordination with different operating units;
- 3. Conduct technical budget reviews and evaluation per operating units vis-à-vis set targets;

- 4. Evaluate programs, projects, and activities proposed and implemented by different divisions and centers of the Bureau as to its technical and economic feasibility and recommend measures to correct weaknesses and deficiencies;
- 5. Consolidate the accomplishment reports of different operating units on a monthly, quarterly, and annual basis;
- Conduct periodic studies to evaluate the impact and benefits of specific programs;
- 7. Initiate and/or develop, in consultation with different operating units, programs and projects for endorsement to the Department of Agriculture (DA) and other funding agencies; and
- 8. Identify and prioritize programs and projects to be undertaken in accordance with the mandates, objectives, and thrust of the Bureau.

#### g. Internal Audit Unit (IAU)

#### • <u>Functions</u>:

- 1. Provide support to operations towards managing and processing of documents such as Purchase Request (PR), Travel Orders (TO), Vouchers and Inspection Acceptance Report (IAR);
- 2. Inspect delivered items (supplies and equipment) to ensure completeness of the items delivered and compliance of the items' specifications requested by the end-user.

#### h. Procurement Management Section

#### • Functions:

- 1. Act as the main support unit of the BAC;
- 2. Provide administrative support to the BAC and the TWG, if necessary;
- 3. Organize and make all necessary arrangements for the BAC meetings as well as TWG meetings, if necessary;
- 4. Attend BAC meetings as Secretary;

- 5. Prepare Minutes of the BAC meetings;
- 6. Take custody of procurement documents and be responsible for the sale and distribution of bidding documents to interested buyers;
- 7. Assist in managing the procurement process;
- 8. Monitor procurement activities and milestones for proper reporting to relevant agencies and/or end-users, when required;
- 9. Be the central depository of all procurement related information and continually update itself with the most current GPPB resolutions issuances, circulars and events, and downstream the same to all relevant officer, employees, and parties requiring information;
- 10. Prepare the APP from the consolidated PPMPs submitted by the various PMOs and end-user units of the Procuring Entity, to make them available for review as indicated in Section 7 of the IRR-A;
- 11. Make arrangements for the pre-procurement and pre-bid conferences and bid openings;
- 12. Act as the central channel of communications for the BAC with the endusers, PMOs, other units of the line agency, other government agencies, providers of goods, civil works and consulting services, and the general public;
- 13. Assist the BAC in preparing drafts of BAC resolutions and recommendation of award of contracts for approval of the HoPE;
- 14. Create, maintain and update the registry of suppliers, contractors, and consultants:
- 15. Recommend the creation of a Technical Working Group (TWG) from a pool of technical, financial and/or legal experts to assist in the procurement process;
- 16. Administer the PhilGEPS, as the counterpart of the service provider
- 17. Transact with the PhilGEPS and PS-DBM on behalf of the Procuring Entity.

#### II. Research and Development and Production Support

- a. Agricultural Engineering Division (AED)
  - <u>Vision:</u> Agricultural Engineering Division is a leading research facility on plant industry's mechanization and protective structure

 <u>Mission</u>: Develop appropriate mechanization technologies and provide modernized infrastructure designs for the plant industry

#### • <u>Functions</u>:

- 1. Conduct agricultural engineering related research and development for the plant industry;
- 2. Determine the mechanization and infrastructure needs of the Bureau with timeline and funding appropriation;
- 3. Develop plans for mechanization and infrastructure projects for BPI research centers such as greenhouses adaptive to climate change, packing houses, cold and ambient storage-houses, seed processing plants, offices, and other laboratories; and
- 4. Ensure soundness of the designs and construction of both equipment and infrastructures, seeing to it that they met the requirements of the centers/offices

#### b. Crop Pest Management Division (CPMD)

- <u>Vision</u>: Strengthen crop pest management services in the country by employing pest management strategies that are effective, safe, and environment-friendly to increase farm productivity, food sufficiency and security
- <u>Mission</u>: We manage the spread of crop pests in the country by ensuring the availability of effective biological control agents, functional surveillance and early-warning system, and regular plant health status updates.

#### <u>Functions</u>:

Plant Pest Surveillance, Monitoring and Forecasting. It focuses on the
collection and recording of data on pest presence or absence by survey,
monitoring, or other procedures. Second activity is monitoring of plant
pests which deals with the verification of phytosanitary situations and
monitoring of plant pests deals with characteristics of a pest populations.

The last activity is Plant Pest Forecasting. It analyzes the perception of danger based on observed biotic and abiotic factors that would directly affect crop quality and quantity of production. The prediction is based on actual pest populations that can or cannot cause economic damage. Systematic data sets for forecasting pest populations over a long period of time are prerequisites for eventual efficient and effective plant pest management.

- 2. **Plant Pest Diagnostics**. This mandate provides plant health analysis and identification of any of the vertebrate and invertebrate pests such as weeds, insects, bacteria, fungi, nematodes, phytoplasma, and viruses directly involved in the occurrence of any plant abnormalities.
- 3. **Plant Pest Management.** It provides control-based strategy that focuses on the prevention of pests or their damage through a combination of techniques such as biological control, chemical control, habitat manipulation, modification of cultural practices, and use of resistant varieties.
- 4. **Biological Control Agents Mass Production**. This requires mass rearing of pure and virulent biological control agents (BCA) to control pests. It includes the use of beneficial insects, fungi, bacteria, nematodes, and other living organisms to control specific pests of plants.
- Competency Training and Extension on Crop Pest Management. It
  involves the learning of personnel on the basic foundation and principles
  of the different management and control strategies against pests and
  diseases.
- 6. **Biosecurity and Quarantine Measures.** This mandate involves in preventing the introduction and/or spread of any sources of inoculum of any of the pathogenic diseases or destructive insects, to minimize the risk of transmission and epidemics. It employs quarantine measures which separate and restrict the movement of plants infested/infected with crop pests.

- 7. **Applied and Adaptive Crop Pest Management Research.** This aims in solving practical pest management problems, which includes efficacy trials under laboratory and field conditions, and simple methods in plant pest diagnostics. Results thus derived have specific commercial objectives in the forms of products, procedures or services that are made readily available to the farmers for utilization.
- 8. **Public Advocacy on Crop Pest Management.** It covers a wide range of activities on pests affecting local or national policy or legislation on crop pest management. Advocacy includes pest management activities, community education, capacity building, relationship building, forming crop pest management networks, and leadership development.

#### c. Crop Research and Production Support Division (CRPSD)

- <u>Vision</u>: A responsive division committed to address plant industry needs and increase farm productivity.
- <u>Mission</u>: We develop crop farming technologies and ensure production of quality seeds and planting materials.

#### • Functions:

- 1. Provide holistic approach and effectively integrate the crop research-related and crop production support to BPI;
- 2. Develop, implement, and monitor the research and development (R&D) program of BPI on crop improvement, plant genetic resources, and culture and management;
- 3. Produce and distribute superior quality seeds and planting materials; and
- 4. Empower stakeholders on crop farming productivity

### d. Baguio National Crop Research, Development, and Production Support Center (BNCRDPSC)

• <u>Vision</u>: A recognized and leading research, development and production center of semi-temperate vegetable seeds and fruit crops

 Mission: Generate crop farming technologies and produce quality seeds of semitemperate vegetable and fruit crops to ensure sustainable food production

#### • <u>Functions</u>:

- 1. Generation of technologies and development programs that respond to the needs of clienteles;
- 2. Production and distribution of NSIC approved seeds and planting materials and development and expansion of integrated pest management program and provision for the establishment of foundation scion grove;
- 3. Capacitate stakeholders through conduct of various training activities on Center's developed technologies; and
- 4. Establish and maintain technology-demonstration farms for matured technologies and as a show window in the capacitation of stakeholders.

### e. Los Baños National Crop Research, Development, and Production Support Center (LBNCRDPSC)

- <u>Vision</u>: A recognized and leading Research, Development and Production Support Center for lowland vegetables
- <u>Mission</u>: Generate crop farming technologies and produce quality seeds of lowland vegetables to ensure sustainable production

#### • Functions:

- 1. Conduct research and development activities aligned with varietal improvement, crop management, and sustainable conservation and utilization of plant genetic resources particularly on lowland vegetables and legumes;
- 2. Produce and distribute seeds and planting materials (conventional and organic seeds) of lowland vegetables, legumes and other high value crops;
- 3. Capacitate stakeholders through conduct of capacity building activities on Center's developed technology; and

#### • Functions:

- Generate technologies on culture management, crop protection, postharvest and processing, socio-economic and organic agriculture on mango and other high value crops;
- 2. Produce and distribute seeds, planting materials and other production support inputs; and
- 3. Promote matured technologies developed by the Center through technical assistance, technology demonstration, and capacity building activities.

### h. La Granja National Crop Research, Development, and Production Support Center (LGNCRDPSC)

- <u>Vision</u>: A recognized and leading Research, Development and Production Support
   Center of legumes and other upland crops
- <u>Mission</u>: Generate crop farming technologies and produce quality seeds of legumes and other upland crops to ensure sustainable food production

#### • <u>Functions</u>:

- 1. Generate crop farming technologies for upland crops with emphasis on legumes, cereals and vegetables in the discipline of crop improvement, crop protection, culture and management, and soils and nutrition;
- 2. Produce and distribute higher class and high quality seeds of NSIC-approved varieties of priority and mandated crops;
- 3. Capacitate stakeholders through conduct of capability building activities on Center's developed technologies; and
- 4. Establish and maintain technology demonstration farms to showcase generated technologies and best practices.

#### III. Regulatory

#### a. National Plant Quarantine Services Division (NPQSD)

- <u>Vision</u>: A professional and highly-recognized regulatory service on plant quarantine ensuring efficient border control and safe agricultural trade
- <u>Mission</u>: Protect the Philippine agriculture from introduction, establishment, and spread of pests and diseases and facilitate safe trade of plants, planting materials, and plant products

#### <u>Functions</u>:

- 1. Licensing of importers and exporters;
- Registration/licensing of packing facilities, farms, treatment providers, and growers;
- Issuance of sanitary-phytosanitary (SPS) import clearance,
   phytosanitary clearance, and clearance for domestic transport;
- 4. Conduct border control and inspection;
- 5. Maintenance of pest-free declared areas;
- 6. Market access and trade facilitation through SPS compliance
- 7. Conduct pest-risk analysis; and,
- 8. Conduct post entry quarantine.

#### b. National Seed Quality Control Services Division (NSQCS)

- <u>Vision</u>: NSQCS is a responsive, committed and internationally compliant seed certification and testing service office.
- <u>Mission</u>: We develop and efficiently implement plans and programs on seed certification and testing services to ensure quality seeds of agricultural crops.

#### • <u>Functions</u>:

 Formulates, recommends and implements plans and programs on seed quality assurance and seed quality control services and activities on seed testing, plant/seed materials certification, and other quality control schemes to be developed;

- Conduct seed samplings and analysis, and issue the corresponding reports of analyses of samples drawn from locally produced and imported seed lots within the purview of the Seed Act;
- 3. Monitor seed quality control programs nationwide;
- 4. Maintain and operate National Seed Quality Control Services through seed testing and seed and plant material certification throughout the country; and
- 5. Accredit seed growers.

#### c. Plant Product Safety Services Division (PPSSD)

- <u>Vision</u>: PPSSD is an internationally recognized regulatory office in providing competent, efficient and quality services responsive to the needs of plant food stakeholders.
- <u>Mission</u>: We ensure safe plant food from primary production to post-harvest stages of the food supply chain through effective food control systems and laboratory services.
- Functions: The Plant Product Safety Services Division ensures plant product safety of fresh and minimally processed plant foods consistent with the Republic Act No. 10611 or the Food Safety Act of 2013 and its Implementing Rules and Regulations. It is tasked to implement the following:
  - 1. Strengthen the implementation of food control system on plant foods;
  - 2. Intensify the monitoring system of contaminants and pesticide residue to assure the supply of safe food for the consumers;
  - 3. Provide analytical services for microbiological, physico-chemical, pesticide formulation and pesticide residue analyses; and
  - 4. Coordinate with other local and international authorities on activities relevant to the functions of the Division.

- Prepare Report of Checks Issued and Cancelled / Report of Collection and Deposit to be submitted to accounting section;
- 3. Issuance of Official Receipts (OR) to all stakeholders requiring it;
- 4. Prepare remittance and certifications for Philippine Health Insurance Co (PHIC), Home Development Mutual Fund (HDMF). and
- 5. Prepare liquidation report on all expenses incurred and paid out of cash advances

#### d. General Services Section (GSS)

#### • Functions:

- 1. Maintain motor pool vehicle, equipment, and building facilities;
- 2. Manage BPI guesthouse and operations;
- 3. Prepare and issue Trip Ticket and provide service vehicle to cater the personnel of the Bureau; and
- 4. Supervise and evaluate of Janitorial and Security Services' routine practices including the sanitation of the workplace and facilities and the safety and security concerns of the entire Bureau

#### e. Information and Computer Section

#### • Functions:

- 1. Document the Agency's programs and activities and prepare write-ups for the information of the stakeholders;
- Assist in packaging of the information and developed researches and crop farming technologies and disseminate the same to educate stakeholders through the use of communication media and ICT;
- 3. Ensure availability of developed technologies and other agricultural information in the Bureau's library;

- 5. Assist in the orchestration or development, deployment and management of developed systems or applications to support BPI processes; and
- 6. Provide overall orchestration and guidelines in the design, acquisition, and maintenance of ICT equipment

#### f. Human Resources Section

#### • <u>Functions</u>:

- 1. Formulate Human Resource Management policies;
- 2. Implement human resource development programs and personnel services; and
- 3. Assists the needs and concerns of the employees of the Bureau of Plant Industry relating to compensations and benefits, grievance machinery, health and wellness, and employee discipline.

#### g. Property and Supply Section

#### • Functions:

- 1. Prepares the Purchase Order (PO);
- 2. Acceptance of the deliveries of good by the suppliers;
- 3. Distribution of supplies/equipment to the end-users;
- 4. Conduct the physical inventory of properties and equipment of the bureau;
- 5. Conduct the disposal of unserviceable properties and equipment of the bureau; and
- 6. Distribution of accountable forms and other government forms of the bureau such as Phytosanitary Certificate, Official Receipts, and Import Clearance.

# TIBES BE PLANT HOLD

#### **Bureau of Plant Industry**

#### **Quality Management System**

#### **SCOPE AND COVERAGE**

Doc Ref No.:	BPI-QMS-DMT-QM1
Effective Date:	February 7, 2024
Revision No.:	6
Page No.:	1 of 4

#### A. Scope and Exclusions

The BPI QMS covers the areas of crop research and production, pest management, plant food safety, seed quality assurance, plant quarantine, and agricultural engineering services. The scope covers the management, operations, and support processes of the Bureau of Plant Industry as indicated in the BPI Process Map.

The operation of the three (3) National Crop Research Development and Production Support Centers (NCRDPSC's) located in Bago Oshiro, Davao City, Jordan, Guimaras, and La Granja, La Carlota City are now part of this process. In addition, five (5) Regional Laboratories of the National Seed Quality Control Services located in Guisad, Baguio City, Los Baños, Laguna, Jaro, Iloilo City, La Granja, La Carlota City, and Bago Oshiro, Davao City, four (4) National Plant Quarantine Stations located in Los Baños, Laguna, Parola. Iloilo City, Bacolod City, Negros Occidental, and Sasa, Davao City, and two (2) Satellite Pesticide Analytical Laboratories located in Guisad, Baguio City, and Bago Oshiro, Davao City were also added in the scope to be part of the said process.

All ISO 9001:2015 processes are applicable in the BPI's QMS.

#### B. Process Map

The BPI business process map is divided into four groups of processes, namely:

- Management Processes activities needed for oversight and governance as well as serve as a decision point for any directives and policies to be issued by the management of BPI, affecting both the internal and external interested parties.
- Operations Processes plans, programs, and activities committed by the Bureau based on its mandates. Key indicators are identified to measure the success of the process/programs and its impact to the stakeholders.
- Support Processes activities needed to perform the assigned processes. It ensures that resources are managed efficiently and effectively resulting to good performance of the Bureau.
- Outsourced Processes goods and services which are essential for the operation of the Office that are procured from third party providers. It is covered by purchase request and passed the requirements of RA 9184 known as "Government Procurement Reform Act".

### **Quality Management System**

#### **SCOPE AND COVERAGE**

Doc Ref No.:	BPI-QMS-DMT-QM1
Effective Date:	February 7, 2024
Revision No.:	6
Page No.:	2 of 4

Conceptually, these four (4) groups of processes are working together to transform the clients' requirements into client satisfaction.

The external stakeholders such as farmers, seed growers, exporters, importers, service providers, and government institutions play an important role in the Bureau's QMS. Stakeholder's consultations are conducted to identify their needs and expectations which serve as one of the guides in program planning.

# Quality Management System QUALITY POLICY

Doc Ref No.:	BPI-QMS-DMT-QM1
Effective Date:	February 7, 2024
Revision No.:	6
Page No.:	1 of 1

The Management maintains the Quality Policy, which ensures the satisfaction of BPI's stakeholders. This is communicated and discussed to all Operating Units (OUs) of the Bureau to ensure that it is understood and applied at all levels of the organization. Likewise, it is displayed in conspicuous areas of the Bureau where it can be read by stakeholders. Comprehension of the Quality Policy is verified through, but not limited to, Internal Quality Audits, Management Reviews, and staff meetings.

The Management is responsible for ensuring that the quality policy is appropriate to its mandate and provides a framework for establishing and reviewing quality objectives and goals. This is reviewed at least every semester to ensure continuing suitability to its mandate and thrusts, including the requirements and needs of its stakeholders.

#### **BPI QMS Quality Policy**

The Bureau of Plant Industry (BPI), mandated to serve and support the Philippine plant industry sector, commits to:

Value and satisfy the needs of our stakeholders in the areas of research and development, production support, and regulatory services;

Adhere to applicable regulations set by the government and international bodies;

Ensure quality services through institutional development; and

Improve continually our Quality Management System (QMS).

#### **Management Processes**

#### A. Management Committee (ManCom) Meeting

ManCom is chaired by the Director of the Bureau of Plant Industry with the Assistant Directors as Vice-chairs. It is composed of all Division and Center Chiefs, NSIC-PVPO Secretariat Head, and Biotechnology Head, Primary Unit Heads the Administrative Office, BAC Chairman and its Head Secretariat, and BPI Employees' Association's President.

It is scheduled every quarter to discuss BPI's concerns and issues. Through the ManCom, the Director is updated on the status of the overall performance of each Operating Unit and gives instructions and directions accordingly.

Minutes of the previous meeting are prepared by the Planning and Management Office (PMO) and are distributed to the ManCom members a week after the meeting.

#### B. Program Implementation Review (PIR)

PIR is the quarterly assessment of accomplishment of all Operating Units vis-à-vis the approved work program. Programs and activities funded by BPI's Core Fund, Banner Programs, Fund 156 (Plant Quarantine), Special Account in General Fund (SAGF), and other external sources are reviewed by the Management Committee Members. Catch-up plans for delayed accomplishment of targets are expected to be submitted by the OUs to PMO.

#### C. Corporate Planning Workshop

The Corporate Planning Workshop is conducted towards the beginning of the last quarter, spearheaded by the PMO, Budget Section, and Accounting Section. This starts the cycle of program and budget preparation for the Bureau of Plant Industry for the following year. Medium Term Development Plan, Secretary's Ten Point Agenda, Six Year Strategic Plan of BPI as well as program performance for the last three years are considered in setting program targets. This is participated by the Center and Division Chiefs, selected senior staff, designated Planning and Budget Staff and Focal Persons of SAGF and Banner Programs such as Rice, Corn, High Value Crops, Organic, and Halal. The output of this activity are proposed physical and financial plans.

# D. Approval and Issuances of Memoranda/Directives, Policy Recommendations and Endorsement of Documents

Only the Director of the Bureau of Plant Industry can issue memoranda and directives that are policy in nature and affect the operation of the bureau. Examples of these are Sanitary and Phytosanitary Import Clearance, Phytosanitary Clearance, Certificate of Accreditation of Seed Growers and Treatment providers, and Certificate of Variety Registration and Protection, Phil-GAP Certificate, Biosafety permit, guidelines pertaining to production support and research and development, among others.

In the event that the Director is on official travel or away from the Bureau, the assigned Officer-in-charge can sign or initial for the Director, as supported by an issued memorandum pertaining to the succession plan.

#### AGRICULTURAL ENGINEERING DIVISION (AED)

The Agricultural Engineering Division is one of the divisions of the Bureau of Plant Industry mandated to address the need to improve farming operations to optimize the use of farm resources—land, labor, and capital. Since 1932, BPI has operated by applying engineering concepts in crop production and advocated farm mechanization aimed at expanding production areas. Today, the division is continuously applying engineering principles to conduct research and development for the development of the plant industry and agricultural production.

Agricultural production involves various activities/operations that necessitate the effective application of labor, power, and materials in the farm from land preparation to post-production, farmers use technology. Appropriate technology gives the farmers the best chance of gaining more by increased production, reduced losses, or reduced cost of labor, among others. These principles guide the Agricultural Engineering Division in the implementation of its key programs, projects, and other activities.

Aside from performing the mandate, the division also plays an important role in all the infrastructure projects of the Bureau from the preparation of plans and ensuring the completion designs meet the standards required by law. Further, the division ensures that the payments that are being collected for the construction are as per declared accomplishment.

#### **BIOTECHNOLOGY OFFICE**

The BPI Biotech office is tasked to supervise activities relevant to the implementation of the DOST-DA-DENR-DOH-DILG JDC No.1, Series of 2021 and to resolve issues pertaining to biotechnology matters that are within the purview of BPI.

The Bureau is mandated by the DOST-DA-DENR-DOH-DILG Joint Department Circular No.1, series of 2021 entitled "Rules and Regulations for the Research and Development, Handling and Use, Transboundary Movement, Release into the Environment, and Management of Genetically-Modified Plant and Plant Products Derived from the Use of Modern Biotechnology" to act as the lead agency in facilitating the processing of the genetically-modified (GM) crop applications for field trial, commercial propagation and

direct use. The BPI Biotechnology Office was created to serve as the main entry point of all GM applications in the Philippines and to provide support to the activities that will ensure the smooth implementation of the said Circular. This includes coordination with other relevant agencies and outside experts who are involved in the safety assessment of GM crops to animal and human health, and the biodiversity, preparation of summarized technical risk assessment reports, and facilitating the issuance of biosafety permit for approval of the BPI Director.

The Biotechnology Office is also tasked to conduct regular monitoring of field trials of GM crops in order to check whether the conditions stipulated in the Biosafety Permit issued by the BPI Director are all complied with by the permit holder. In addition to this, the Biotechnology Office is mandated to conduct compliance monitoring of permit holder's implementation of the Insect Resistance Management (IRM) strategy as well as monitoring of the possible evolution of weeds developing resistance to glyphosate and shifting in the weed population.

#### **CROP PEST MANAGEMENT DIVISION (CPMD)**

The Crop Pest Management Division (CPMD) has the responsibility to implement BPI's mandate on the management of pests. The division is composed of three (3) different sections namely: Pest Forecasting Section, Biological Control and Integrated Pest Management (IPM) Section, and Plant Health and Pest Status Section. CPMD has eight (8) important functions such as: 1) plant pest surveillance, monitoring and forecasting; 2) plant pest diagnostics; 3) plant pest management; 4) biological control agents mass production; 5) competency training and extension on crop pest management; 6) biosecurity and quarantine measures; 7) applied and adaptive crop pest management research; and 8) public advocacy on crop pest management.

Plant Pest Surveillance, Monitoring and Forecasting has three (3) major activities: 1) collection and recording of data on pest presence or absence by survey, 2) monitoring of plant pest which deals with the verification of phytosanitary situations and characteristics of a pest populations and 3) Plant Pest Forecasting which analyzes the perception of danger based on observed biotic and abiotic factors that would directly affect crop quality and quantity of production.

**Plant Pest Diagnostics** provides plant health analysis and identification of any of the vertebrate and invertebrate pests directly involved in the occurrence of any plant abnormalities.

The **Plant Pest Management** provides control-based strategy that focuses on the prevention of pests or their damage through a combination of techniques such as biological control, chemical control, habitat manipulation, modification of cultural practices, and use of resistant varieties.

The **Biological Control Agents Mass Production** (BCAs) to control pests is also a vital function of the division. It includes the use of beneficial insects, fungi, bacteria, nematodes, and other living organisms to control specific pests of plants.

The **Competency Training and Extension on Crop Pest Management** which involves the learning of personnel on the basic foundation and principles of the different management and control strategies against pests and diseases.

**Biosecurity and Quarantine Measures** prevents the introduction and/or spread of any sources of inoculum of any of the pathogenic diseases or destructive insects and employs quarantine measures which separate and restrict the movement of plants infested/infected with crop pests.

**Applied and Adaptive Crop Pest Management Research** function aims in solving practical pest management problems, which includes efficacy trials under laboratory and field conditions, and simple methods in plant pest diagnostics. Thus, the results are made readily available to the farmers for utilization.

**Public Advocacy on Crop Pest Management** that includes pest management activities, community education, capacity building, relationship building, forming crop pest management networks, and leadership development. Towards this end, the functions and services vital to successful crop pest management shall be clearly and properly established and interlinked with all DA related agencies and activities.

#### **CROP RESEARCH AND PRODUCTION SUPPORT DIVISION (CRPSD)**

Crop Research and Production Support Division (CRPSD) is mandated to generate crop production technologies accessible to farmers, assure farmers the continuous and stable supply of quality seeds and plant materials of improved crop varieties and cultivars and provide assistance to farmers on recommended crop production technologies. The division performs several functions such as providing holistic approach and effectively integrating the crop research-related and crop production support to the Bureau; developing, implementing, and monitoring the research and development (R&D) program of the Bureau on culture management and plant genetic resources; producing and distributing superior quality seeds and planting materials; and empowering stakeholders on crop farming productivity.

There are three sections under the CRPSD namely, Crop Improvement and Plant Genetic Resources Section (CIPGRS), Crop Culture and Management Section (CCMS), and Crop Production Support Section (CPSS). These sections perform interrelated functions.

#### <u>Crop Improvement and Plant Genetic Resources Section</u>

The CIPGRS plans, orchestrates, facilitates, and monitors the R&D programs and activities of the Bureau concerning crop improvement, conservation of biodiversity and promotion of sustainable utilization of Philippines Plant Genetic Resources (PGR). It is also responsible for the establishment and strengthening of linkages with other R&D institutions and provides technical advisory services to the Research Centers of the Bureau and other stakeholders on crop improvement and PGR management. It also conceptualizes and conducts research on crop improvement and plant genetic resources.

#### **Crop Culture and Management Section**

CCMS plans, orchestrates, facilitates, and monitors the R&D programs and activities of the Bureau concerning crop culture and management (Improved Crop Culture). This section is concerned with the development of tissue culture protocol for mass propagation and virus elimination. Like CPIGRS, it also establishes and strengthens linkages with other

Page No.:	5 of 15

R&D institutions. Additionally, it provides technical advisory services to the Research Centers of the Bureau and other stakeholders on crop culture and management.

#### **Crop Production Support Section**

CPSS plans, orchestrates, and facilitates the production and distribution of high-quality seeds and planting materials of NSIC-registered crop cultivars and other high-yielding varieties. It is also tasked to monitor the seed and plant material distribution performance of the BPI. It also implements the special programs and projects of DA such as Urban Agriculture Program and Gulayan sa Paaralan.

In addition, there are Banner Programs under CRPSD such as rice and corn, highvalue crops, organic agriculture, and Halal Food Industry Development. The Rice and Corn Program, a National Banner Program of the DA, plays a vital role in achieving food security, competitiveness, and a sustainable seed industry where farmers benefit from decent and increasing standards of living. It also ensures the availability of high-quality seeds to be distributed at any given time especially during calamities and unanticipated events affecting rice and corn seed production. Production support, education and training extension services as well as research and development were orchestrated and conducted to guarantee the effective implementation of the activities of the program. CRPSD also implements and orchestrates activities under the High-Value Crops and Development Program (HVCDP). The main objective of the program is to ensure the availability of quality seeds and planting materials through different activities and programs, such as Gulayan sa Paaralan and the Urban Agriculture Program. In addition, CRPSD assists in the development and promotion of organic seed production technologies under the Organic Agriculture Program in the Philippines through Republic Act 11511, also known as the "Amended Act of Organic Agriculture Act of 2010." The BPI through the CRPSD, in coordination with other agencies under DA, assists also on the promotion, such as information awareness campaign, of the Halal Food Industry Development Program (HFIDP) through Republic Act 10817 or the "Philippine Halal Export Development and Promotion Act of 2016."

#### NATIONAL PLANT QUARANTINE SERVICES DIVISION (NPQSD)

National Plant Quarantine Services Division (NPQSD) was created by virtue of Executive Order 366 Series of 2013. The Bureau, being a member of the International Plant Protection Convention and other organizations, serves as the National Plant Protection Organization. Presidential Decree No. 1433, known as the "Plant Quarantine Decree of 1978", strengthened the adequate updated laws, regulations, resources, and facilities to monitor and control movement of plant pests and diseases. Since then, it aimed to protect Philippine Agriculture by preventing the introduction of new pests and its further spread, complying with phytosanitary standards and facilitating safe trade. The NPQSD has thirteen regional offices nationwide and the central office has been divided into four sections/functions: Import Section, export section, domestic quarantine and administrative section.

#### **Import Section**

The Import Section of the NPQSD-Central Office has four primary functions: importer licensing, sanitary and phytosanitary import clearance, pest risk analysis, and multilateral and bilateral negotiations.

All applications for importers licensing must and can only go through the NPQSD-Central Office. The process of licensing begins upon submission of requirements from the applicant. Once the submitted documents are accepted and evaluated, the Central Office coordinates with the applicant for their respective schedule of inspection. A Plant Quarantine Inspector is then assigned and deployed to conduct an onsite inspection of the declared facilities (e.g. offices, warehouses, cold storage facilities).

The applicant must then attend an orientation facilitated by the NPQSD Central Office, which covers the following topics: plant quarantine laws; existing orders, rules, processes and regulations on importation; allowable plants, plant products and planting materials for importation. Upon completion of the orientation activity, the application will then be forwarded to the incumbent director of BPI for final approval. Once signed, the applicant or his/her authorized representative may claim their License to Operate at the NPQSD Central Office. This certificate will be valid for THREE (3) YEARS upon the date of issuance. An audit

# **Quality Management System**

#### **CORE OPERATIONS**

Doc Ref No.:	BPI-QMS-DMT-QM1
Effective Date:	February 7, 2024
Revision No.:	6
Page No.:	7 of 15

of registered importers will be conducted at least once throughout the duration of their certification.

Once registered under the NPQSD, an importer may then apply online for and be issued a Sanitary and Phytosanitary Import Clearance (SPS-IC) through the DA trade system. Each application is reviewed by the Central Office prior to endorsement by the NPQSD Chief for the approval of the BPI Director.

The Import Section also performs the pest risk analysis (PRA), wherein imported plants, plant products and planting materials are analyzed using pest categorization, risk assessment, and risk management. This process is conducted to prevent the event of pest outbreaks within the Philippines. This involves the review of existing PRAs for existing information, such as high pest detection, updated policies and regulations, as well as new pest information on the country of import. This process enables the NPQSD to stay informed on current import conditions, establish and/or update its pest database, communicate with stakeholders and trading partners identified by the PRA, and conduct site visits at the exporting country to determine appropriate risk management measures for implementation prior to export of commodity.

Upon the completion of risk analysis and management, the Import Section will facilitate a consultation with import stakeholders to draft a multilateral and/or bilateral agreement(s) to develop new or improve existing import and export program protocols based on the recommendations from the PRA results. This process includes: preparing information, and compiling a dossier to support market access proposals; reviewing and responding to risk analyses results by importing countries; and participating in actual negotiations with other countries.

#### **Export Section**

The Export Section of the NPQSD Central Office primarily handles two responsibilities: first, the registration of exporters, as well as export-related growers and farms; and second, the accreditation of packing facilities and treatment providers, such as fumigators, heat treatment and other quarantine treatments.

# **Quality Management System**

#### **CORE OPERATIONS**

Doc Ref No.:	BPI-QMS-DMT-QM1
Effective Date:	February 7, 2024
Revision No.:	6
Page No.:	8 of 15

Under the export section are activities on Sanitary and Phytosanitary (SPS) Concerns on Export which involves Notification of Non-compliance (Issuance of notifications of non-compliance; conduct of investigation for Philippine exports with notification of Non-compliance.

Also a part of export section is the review of International Standards on Phytosanitary Measures (ISPMs) and other regional standards; review of Export Phytosanitary Requirements; Market Access involves profiling of Commodity (preparation of commodity profile dossiers for commodities for export and Review of Specific Commodity Understanding/ Memorandum of Agreement/ Work plan with export trading partners. Inspection visits by trading partners

For Export Issuances: E-Phyto Implementation and Manual Phytosanitary Certificate Issuance involves E-phyto development and implementation (as per memorandum Order No. 64 Series of 2018); Issuance of Manual Phytosanitary Certificates (conducts commodity inspection, treatment and preparation of PCs). It is also involved in the special export program for Mango, Okra and Papaya. Special programs involve Operation schedule for mango, okra and papaya inspection and certification, review of export protocols with partner countries and of trainings/ seminars in the implementation of export protocol.

Export section also involves International Arrangements on Biosecurity (International Standard on Phytosanitary Measures No. 15 (ISPM 15)). Australian Fumigation Accreditation Scheme (AFAS), International Cargo Biosecurity Arrangement (ICBBA) and Quarantine Regulators Meeting (QRM).

#### **Domestic Quarantine**

Domestic Quarantine activities involve Domestic Policy Review, Operation and Coordination where NPQSD Central Office coordinates with the Crop Pest Management Division with regards to surveillance of important pests of high value crops and joins in the operation of emergency measures and confirms the eradication for any further decisions to be taken for certain pest outbreak. It also covers review of the existing administrative orders for domestic movement of plants, plant products, planting material and other materials for any update on the scope of infestation on a certain area.

# **Quality Management System**

#### **CORE OPERATIONS**

Doc Ref No.:	BPI-QMS-DMT-QM1
Effective Date:	February 7, 2024
Revision No.:	6
Page No.:	9 of 15

Domestic Clearance Issuances involve preparation of clearance for domestic transport and movement of plants, plant products and planting material brought under regulation in order to prevent the introduction or further spread of a pest and commodity inspection of the plant, plant products and planting materials to ensure that the commodities are pest-free.

# NATIONAL SEED INDUSTRY COUNCIL – PLANT VARIETY PROTECTION OFFICE (NSIC-PVPO)

#### National Seed Industry Council (NSIC)

The National Seed Industry Council replaced the Philippine Seed Board by virtue of Republic Act 7308 otherwise known as "The Seed Industry Development Act of 1992" to oversee the functions of crop varietal registration. RA 7308 created a Council Secretariat who shall furnish the necessary administrative, secretarial, and other support services to the Council.

The variety registration process shall pass through three (3) levels of evaluation: (1) Evaluation of the Crop Entry Performance Test (CEPT) results by the concerned Technical Working Group (TWG); (2) Technical Secretariat (TechSec) further evaluation and verification of CEPT results; and (3) final deliberation and approval of the Council and enlistment in the NSIC Registry. Members of the TWG and Technical Secretariat are drawn from concerned government and non-government institutions engaged in plant breeding activities. Meanwhile, the Council membership is constituted in accordance with the provisions set by RA 7308.

#### Plant Variety Protection Office (PVPO)

The Plant Variety Protection (PVP) scheme started as soon as the Philippines enacted into law its plant breeder's rights through Republic Act 9168 otherwise known as the "Plant Variety Protection Act of 2002". The PVP Act aims to protect and secure the exclusive rights of breeders with respect to their new plant variety.

The creation of the Plant Variety Protection Office (PVPO) was based on RA 9168 Implementing Rules and Regulations. RA 9168 IRR, Chapter V, Article 14 states that there shall be established a Plant Variety Protection Office under the Department of Agriculture,

# TIDON BE TO PELANT MORE

#### **CORE OPERATIONS**

Doc Ref No.:	BPI-QMS-DMT-QM1
Effective Date:	February 7, 2024
Revision No.:	6
Page No.:	10 of 15

which shall be headed by the Registrar. Article 15 of the IRR further elaborates that the PVP Office shall receive and conduct examination of applications for plant variety protection; receive petitions for compulsory license for transmittal to the Board; and maintain a systematic record of all Certificates of Plant Variety Protection, a database of existing plant varieties collected from both local and foreign sources, and samples of the propagating materials of the protected variety.

The PVP Office's core function is to receive and conduct examination of applications for plant variety protection which includes the following process: conduct and examination of Distinctness, Uniformity and Stability (DUS) Test; analysis of the DUS data; and assist the PVP Board in the review and evaluation of applications, policies, and test guidelines.

Further, Section 4 of RA 9168 stipulates that the Certificate of Plant Variety Protection shall be granted for varieties that are: (1) New; (2) Distinct; (3) Uniform; and (4) Stable. A variety shall be considered "New" if the propagating or harvested material of the variety has not been sold, offered for sale or otherwise disposed of to others, by or with the consent of the breeder, for purposes of exploitation of the variety: (a) In the Philippines for more than one (1) year before the date of filing of an application for Plant Variety Protection; or (b) In other countries or territories in which the application has been filed, for more than four (4) years or, in the case of vines or trees, more than six (6) years before the date of filing of an application for Plant variety Protection. On the other hand, a variety shall be deemed "Distinct" if it is clearly distinguishable from any commonly known variety and "Uniform" if subject to the variation that may be expected from the particular features of its propagation, it is sufficient uniform in its relevant characteristics. Lastly, the variety shall be deemed "stable" if its relevant characteristics remain unchanged after repeated propagation or, in the case of a particular cycle of propagation, at the end of each such cycle.

Moreover, Section 76 of the PVP Act states that NSIC, created under RA 7308, shall perform the functions of the Plant Variety Protection Board until the latter has been fully organized, but not later than three (3) years from the effectivity of the Act RA 9168 Section 76 further states that, within the same period, the Director of the Bureau of Plant Industry (BPI) shall be the Acting Registrar and the Assistant Director of the same Bureau shall act as Associate Registrar. However, as agreed during the previous PVP Board meetings, the Bureau shall continue to function as such, after the transitory period. It is further agreed

from the Board meetings that the Council Secretariat shall also act as the PVP Secretariat.

#### NATIONAL SEED QUALITY CONTROL SERVICES (NSQCS)

National Seed Quality Control Services (NSQCS) as mandated by Republic Act 7308 otherwise known as the "Seed Industry Development Act of 1992", supports the major thrusts of DA and BPI through the provision of quality assurance and control services for seed and planting material production, processing, storage, and distribution and seed training in seed quality control towards sustainable agriculture and environment protection.

The NSQCS implements quality control procedures in certification both for seed stock production of government and private institutions including private seed growers and producers. NSQCS has one (1) central, sixteen (16) regional and eight (8) satellite seed testing laboratories that are strategically located nationwide. NSQCS performs major activities such as seed certification, seed testing and plant material certification.

#### **Seed Certification**

Seed certification is a system of seed production geared towards maintaining genetic identity, varietal purity, and standards of quality seeds of superior crop varieties. This activity requires accreditation of seed growers through the issuance of certificate of accreditation duly signed by the BPI Director.

#### **Seed Testing**

Seed Testing is the first seed quality control scheme developed to avoid hazards in crop production due to planting of inferior seeds. This is achieved through evaluation of the planting value of seed by determining the various quality attributes such as moisture content determination, physical purity test, germination test, varietal purity test, and seed health test. Procedures for seed testing are in accordance with the rules and regulations of the International Seed Testing Association (ISTA) or what is sanctioned by the National Seed Industry Council (NSIC). NSQCS obtained ISO/IEC 17025:2005 accreditation on February 19, 2019 from Department of Trade and Industry-Philippine Accreditation Bureau (DTI-PAB). After the reassessment on September 5-7, 2023, continued accreditation was granted to the NSQCS laboratory in compliant to ISO/IEC 17025:2017 on November 16, 2023.

## **Quality Management System**

#### **CORE OPERATIONS**

Doc Ref No.:	BPI-QMS-DMT-QM1
Effective Date:	February 7, 2024
Revision No.:	6
Page No.:	12 of 15

#### **Plant Material Certification**

Plant Material Certification aims to maintain and make available high quality planting materials of superior crop varieties of known genetic identity and varietal purity including reasonable standards of quality considered for crops propagated and distributed. This activity includes accreditation of plant nursery operator through the issuance of certificate of accreditation duly signed by the BPI Director. Another activity of plant material certification section is to accredit tissue culture facility. It aims to recognize laboratories that comply with the minimum requirements for a tissue culture laboratory that produce quality planting material.

#### PLANT PRODUCT SAFETY SERVICES DIVISION (PPSSD)

Republic Act No. 10611 also known as the "Food Safety Act of 2013" mandated the Bureau as a Food Safety Regulatory Agency (FSRA) under DA. The Plant Product Safety Services Division (PPSSD) undertakes responsibilities relevant to food safety of fresh and minimally processed plant foods from primary production to post-harvest stages of the food supply chain.

It consists of three (3) sections namely, Accreditation and Inspection Section (AIS), Contaminants Laboratory Section (CLS), Pesticide Analytical Laboratory Section (PALS). It also has four (4) Satellite Pesticide Analytical Laboratories (SPALs) in Baguio, Cebu, Cagayan de Oro, and Davao.

#### Accreditation and Inspection Section

AIS is composed of Food Safety Unit, Risk Analysis Unit and GAP Unit. The Food Safety Unit inspects, registers, and issues endorsement prior to licensing of packing

houses and establishments for compliance to food safety standards and regulations involved in the distribution of fresh and minimally processed fruits and vegetables. It also inspects packinghouses of fresh agricultural produce intended for export and domestic markets for compliance to food safety standards and regulations.

Revision No.:	6
Page No.:	13 of 15

Risk Analysis Unit conducts food safety risk analysis of imported plant food for market access. It also conducts food safety risk assessment of plants and plant products derived from modern biotechnology.

The GAP Unit, on the other hand, implements Philippine Good Agricultural Practices (PhilGAP) Program and acts as the Secretariat for the PhilGAP certification. It assigns inspectors to perform farm inspection and generates reports to be reviewed and approved by the PhilGAP certification committee. Qualified farmers are then awarded with the PhilGAP certificate.

#### **Contaminants Laboratory Section**

CLS is composed of Microbiological Contaminants Unit (MCU) and Chemical Contaminants Unit (CCU). MCU monitors and provides analytical services for microbiological contaminants in fresh and minimally processed plant food while CCU monitors chemical contaminants and provides analytical services for fresh and minimally processed agricultural produce.

#### Pesticide Analytical Laboratory Section

PALS is composed of Pesticide Residue Unit (PRU) and Formulation Analysis Unit (FAU), both are ISO/IEC 17025:2017 certified. The section monitors pesticide residue level in locally produced and imported agricultural commodities and provides analytical services for pesticide residues and formulation to various stakeholders. PALS covers Regions III, IV-A, IV-B, V, and National Capital Region (NCR).

#### Satellite Pesticide Analytical Laboratories

SPALs monitor pesticide residue levels and provide pesticide residue analytical services in their respective regions. SPAL-Baguio covers Regions I, II, and Cordillera Autonomous Region (CAR). SPAL-Cebu covers Regions VI, VII, and VIII. SPAL-Cagayan de Oro covers Regions IX, X, and XIII. SPAL-Davao covers Regions XI, XII, and Bangsamoro Autonomous Region of Muslim Mindanao (BARMM).

# NATIONAL CROP RESEARCH, DEVELOPMENT, AND PRODUCTION SUPPORT CENTERS (BAGUIO, LOS BAÑOS, DAVAO, GUIMARAS, LA GRANJA)

Baguio, Los Baños, Davao, Guimaras and La Granja National Crop Research, Development, and Production Support Centers (NCRDPSC) are mandated to generate crop farming technologies and produce quality planting materials to ensure sustainable food production. It envisions to be recognized as the leading research, development, and production support centers for semi-temperate vegetables (Baguio), lowland vegetables (Los Baños), tropical fruit crops (Davao), mango and other high value crops (Guimaras), and field legumes and other upland crops (La Granja). They actively conduct research and development activities on plant genetic resources, varietal development, culture and management, crop protection, seed production (conventional and organic), biotechnology and agricultural engineering interventions for modernized crop production. They promote the use of NSIC-approved varieties for commercial production and continuously develop and disseminate crop farming technologies to farmers and various stakeholders throughout the country.

Baguio, Los Baños and La Granja Centers cater to the needs of stakeholders through production and distribution of conventional and certified organic vegetable, legume and cereal, indigenous vegetable seeds, culinary and medicinal herbs and spices, seedlings of sexually and asexually propagated fruit trees and plantation crops, lowland vegetable seeds, mango, cashew, botanical plants, cuttings of sweet potato and cassava, and other farm inputs such as naturally fermented solutions and vermicompost. They also support the National Programs in attaining food security and sustainability through provision of high-quality seeds, planting materials, and other production support inputs especially in times of calamities and unforeseen events affecting vegetable production. They disseminate developed technologies through technical assistance, technology demonstrations, participatory seed production and field trials, trainings, exhibits, farmers' fora and field days, and Information, Education and Communication (IEC) materials' distribution.

Moreover, Baguio NCRDPSC produces and distributes biological control agents like *Trichoderma* spp. and *Diadegma semiclausum* and conducts disease indexing for potato, banana, garlic and citrus while La Granja NCRDPSC produces and distributes BCA's like Assasssin bugs and *Trichogramma spp*. In addition, Davao NCRDPSC produces BCA's such as *Chilocorus nigrita*, *Chilocorus circumdata*, *Beauveria bassiana*, and *Metarhizium anisopliae* and conducts disease indexing on banana and cassava.

On the other hand, conventional breeding techniques are being used to continuously develop new varieties of lowland vegetables, legumes and other high value crops for Los Baños NCRDPSC while exclusively for field legumes for La Granja NCRDPSC.

#### A. CENTRAL OFFICE

#### 1. Accounting Section

The Accounting Section is responsible for the processing, controlling, recording and management of financial transactions incurred to support the day-to-day operation of the Bureau. It ensures that all financial transactions are in accordance with the policies and guidelines set forth by different governing body such as but not limited to Bureau of Internal revenue, Commission on Audit, Department of Budget and Management, Bureau of Treasury, Department of Finance, Civil Service Commission, and other relevant accounting policies, e.g. Philippine Public Sector Accounting Standards and Government Accounting Manual. Its functions include processing of claims of internal and external creditors, recording the financial transactions in the book of accounts, preparation of the financial reports for different financial statement users, analysis and interpretation of financial reports and performance, coordination with government agencies and financial institutions relating to financial matters, and provides assistance to employees and external creditor.

#### 2. Budget Section

The main function of Budget section includes (a) preparation of budget proposal of the bureau, (b) review and sign of budget proposal for submission to the Department of Agriculture and Department of Budget Management, (c) ensure the timely submission of the monthly obligation report and the quarterly financial accountability report needed by concerned agencies such as Department of Agriculture-Office of the Secretary, Commission on Audit, and Department of Budget and Management, and (d) allocation of fund sources (101 - General Appropriations Act, 156 - Plant Quarantine Fund, SEED FUND and trust funds) for Purchase Requests, Purchase Orders, and vouchers.

#### 3. Cashier Section

The Cashier Section supports in the achievement of financial services to the management and other operating units in form of payment for various expenses of all customers and stakeholders, and processes that may involve payment, check preparation, and disbursement.

### **Quality Management System**

#### **SUPPORT PROCESS**

The Cashier Section is specifically responsible for the issuance of all checks and Official Receipts, Advice of Checks Issued and Cancelled (ACIC), List of Due and Demandable Accounts Payable–Advice to Debit Account (LDDAP-ADA) through Department of Budget and Management's National Cash Allocation (NCA), and Debit Memo (DM) for Regular Revolving Fund to be submitted daily to Landbank of the Philippines and Development Bank of the Philippines. In addition, submission of remittance and safekeeping of monthly contributions for Philippine Health Insurance Corp. (PHIC), and Home Development Mutual Fund (HDMF) were also maintained.

The Cashier Section also ensures that all payments made are documented and reported to the Accounting Section, pursuant to regulatory guidelines of oversight agencies such as Commission on Audit (COA).

#### 4. General Services Section (GSS)

The General Services Section plays a vital role in the day-to-day support to the operations of BPI. It manages the motor pool through the preparation and issuance of trip tickets, consolidation of fuel and lubricants consumptions, vehicles' maintenance, Land Transportation Office (LTO) registration, Government Service Insurance System (GSIS) insurance, and dispatch of service vehicles for BPI Personnel. It ensures that all building facilities of BPI Divisions are in good condition by providing repair and maintenance services. It maintains the cleanliness and safety inside the BPI by supervising the performance of outsourced janitorial and security services.

#### 5. Internal Audit Unit (IAU)

The Internal Audit Unit (IAU), under the Office of the Director, provides the day-to-day support to the operation of the Bureau by managing and implementing the processes which encompasses the check and control of documents such as Purchase Requests (PRs), Travel Orders (TOs), Vouchers, and Inspection Acceptance Report (IAR). These documents are verified and approved by the IAU head and forwarded to the concerned operating units. The IAU also conducts inspection of the delivered supplies and equipment to ensure the completeness and compliance with the specifications as stipulated in the document.

#### 6. Information and Computer Section (ICS)

The Information and Computer Section (ICS) is tasked to document the Agency's programs and activities and disseminate information for stakeholders. One of its roles is to assist in the packaging and disseminating information including developed researches and crop farming technologies to educate stakeholders through the use of communication media and ICT. ICS also ensures the availability of developed technologies and other agricultural information in the Bureau's library. Furthermore, they are tasked to upload information, enhance contents, and update the Bureau's website and social media accounts to make information more accessible to the public. It also assists in the development, deployment, and management of systems or applications to support BPI processes. Additionally, it provides overall orchestration and guidelines in the design, acquisition, and maintenance of ICT equipment.

#### 7. Human Resources Section

The Human Resources Section ensures the provision of good quality services, proper policies and regulations, and assists the needs and concerns of the employees of the Bureau of Plant Industry. The Human Resources Section is responsible for:

#### 1. Recruitment, Selection and Placement (RSP)

The Human Resources Section adheres to the existing policies that initiate all actions for vacant positions of the BPI. It also sets the approach to the Recruitment, Selection and Placement of personnel, and the fulfillment of the BPI's commitment to equality, diversity, fairness, and transparency. The aim is to have the right person in the right job at the right time, which is essential to the Agency's performance.

#### 2. Learning and Development (LD)

BPI commits to ensure that its clients are served by a skilled, well-trained, professional workforce. It fosters the value of a strong leadership anchored on progressive management practices and continuous improvements on the performance of our manpower. The Human Resources Section ensures that all employees have equitable access to learning and development opportunities for their development.

#### 3. Performance Management (PM)

The Human Resources Section, as part of the Performance Management Team (PMT) of BPI, is making sure of the interaction where the Top Management communicates the BPI's strategic mission and vision to every manager, supervisor and rank, and file personnel who then develops individual goals designed to achieve the BPI's strategic objectives.

#### 4. Rewards and Recognition (RR)

The Human Resources Section encourages the recognition of excellent performance and achievements of its employees in assisting the BPI in pursuing its strategic goals and objectives through the use of creative, flexible and meaningful rewards which support other Human Resources Section's responsibilities.

The Human Resources Section is also concerned with matters relating to compensations and benefits of the employees from their appointment to retirement. It also facilitates programs and activities on employee relations including grievance machinery, health and wellness, and employee discipline.

#### 8. Planning and Management Office (PMO)

The Planning and Management Office (PMO) is under the Office of the Director. PMO provides services to the management and its operating units in formulating responsive and comprehensive development plans, programs, projects, and activities. It also assists the management in the decision making through complete staff work and effective feedback mechanism.

The functions of PMO are (a) lead in the preparation of Annual Work and Financial Plan (WFP) in accordance with approved policies; (b) assist in preparing, reviewing, and consolidating of plans and budget in coordination with different operating units; (c) conduct technical budget reviews and evaluation per operating units vis-à-vis set targets; (d) evaluate programs, projects, and activities proposed and implemented by different divisions and centers of the Bureau as to its technical and economic feasibility and recommend measures to correct weaknesses and deficiencies; (e) consolidate the accomplishment reports of different operating units on a monthly, quarterly, and annual basis; (f) conduct periodic studies to evaluate the impact and benefits of specific programs; (g) initiate and/or develop, in consultation with different operating units, programs and projects for

endorsement to the Department of Agriculture (DA) and other funding agencies; and (h) identify and prioritize programs and projects to be undertaken in accordance with the mandates, objectives, and thrust of the Bureau.

#### 9. Procurement Management Section

The Procurement Management Section (PMS) is responsible for ensuring that the Procuring Entity and the procurement process abides by the standards set forth by the Republic Act 9184 and its Implementing Rules and Regulation (IRR). The PMS also has the following functions: (a) act as the main support unit of the BAC; (b) provide administrative support to the BAC and the TWG, if necessary; (c) organize and make all necessary arrangements for the BAC meetings as well as TWG meetings, if necessary; (d) attend BAC meetings as Secretary; (e) prepare Minutes of the BAC meetings; (f) take custody of procurement documents and be responsible for the sale and distribution of bidding documents to interested buyers; (g) assist in managing the procurement process; (h) monitor procurement activities and milestones for proper reporting to relevant agencies and/or end-users, when required; (i) be the central depository of all procurement related information and continually update itself with the most current GPPB resolutions issuances, circulars and events, and downstream the same to all relevant officer, employees, and parties requiring information; (j) prepare the APP from the consolidated PPMPs submitted by the various PMOs and end-user units of the Procuring Entity, to make them available for review as indicated in Section 7 of the IRR-A; (k) make arrangements for the pre-procurement and pre-bid conferences and bid openings; (1) act as the central channel of communications for the BAC with the end-users, PMOs, other units of the line agency, other government agencies, providers of goods, civil works and consulting services, and the general public; (m) assist the BAC in preparing drafts of BAC resolutions; **(n)** create, maintain and update the registry of suppliers, contractors, and consultants; (o) recommend the creation of a Technical Working Group (TWG) from a pool of technical, financial and/or legal experts to assist in the procurement process; (p) administer the PhilGEPS, as the counterpart of the service provider (q) transact with the PhilGEPS and PS-DBM in behalf of the Procuring Entity.

#### 10. Property and Supply Section

The Property and Supply Section is responsible for efficient delivery of goods and services from suppliers/dealers. The section ensures proper store-keeping of supplies, physical inventory of properties and equipment, distribution of the acquired goods and services, and disposal of unserviceable and condemned equipment. It also prepares Purchase Order (PO) based from the approved bidding documents submitted by the Bids and Award Committee (BAC) and Disbursement Voucher (DV) and supporting documents to facilitate the payment to suppliers/dealers. Moreover, the Section distributes the Accountable Forms such as Official Receipts (OR), Phytosanitary Certificates, and Import Permits to all concerned BPI offices upon request.

#### 11. Records Section

Records Section ensures the efficient records management system of the Bureau of Plant Industry by implementing the following: (a) Maintaining efficient procedure for control, identification, filling, access and retrieval, storage, and proper disposition of all records per set standards; (b) Designating a storage area for office records; and (c) having a disposal system based on current National Archives of the Philippine's systems and procedures.

# B. NATIONAL CROP RESEARCH DEVELOPMENT AND PRODUCTION SUPPORT CENTERS (BAGUIO, LOS BAÑOS, DAVAO, GUIMARAS, LA GRANJA)

#### 1. Accounting, Budget, and Cashier Unit

The Accounting processes the vouchers of all the purchases and transactions of the Centers. This also includes preparation of financial status reports and audited financial reports.

The Budget allocates and controls the budget of all the regular-funded and specialfunded projects of the Centers. It is also responsible on the recording and tracking of disbursements of various funds in the control books.

The Cashier prepares payment for all the purchases and transactions of the Centers and issues cheques. It prepares and submits liquidation reports of issued cheques and collection reports. It also issues official receipts to various creditors and posts in the cash books the daily collection and balances.

#### 2. General Support Services (GSS) and Farm Mechanization Unit

The GSS Unit is responsible for the over-all cleanliness, maintenance, orderliness and proper operations of Center's premises, landscapes and structures. It is in-charge in the minor repair and maintenance of all official vehicles, machineries and facilities of the Centers, facilitates the registration of official vehicles, prepares trip tickets, dispatches official vehicles, and keeps record of fuel consumption. It supervises security guards employed and contracted by the Bureau.

Moreover, Los Baños NCRDPSC-GSS Unit performs field operations and provides assistance in the transportation and hauling of supplies in support to the research and production activities.

The Farm Mechanization Unit of La Granja NCRDPSC is responsible in field operations including land preparation in support to research and seed production and repair and maintenance of farm machineries, service vehicles and farm implements.

#### 3. Internal Audit Unit (IAU)

The IAU conducts periodic management audit of activities and its units and determines the degree of compliance with BPI-ISO 9001:2015 Quality Management System (QMS). Reviews, submits recommendations, and monitors necessary actions for the improvement of the system based on an agreed timeline. IAU also checks and verifies the completeness of Purchase Requests (PRs) and Purchase Orders (PO) of the Center.

#### 4. Personnel Unit

The Personnel Unit ensures that all communications downloaded and directives from the BPI personnel section are efficiently disseminated and complied. It is responsible for the recruitment, selection and placement of contractual personnel, and facilitates the prescreening of permanent positions below Salary Grade (SG) 18. It consolidates and maintains record of personnel's 201 file, competency and capacity building of staff, Statement of Assets and Liabilities Net worth (SALN), and Individual Performance Commitment Review (IPCR). It also prepares and records attendance, leaves and absences, and computes accumulated leaves earned by the Center's staff for submission to the Central Office. The unit also assists the Center's Committee on the Preparation of Magna Carta (BPI-LB CPMC) on the

preparation of requirements for application, renewal and processing of Magna Carta benefits.

#### 5. Planning Unit

The Planning Unit facilitates the planning activities of the Center and the preparation and consolidation of Work and Financial Plan (WFP) for regular and banner programs. It submits periodical accomplishment reports and Program Monitoring and Evaluation System (PMES) of the Center to the planning and management office of BPI Central Office. It also reviews and submits Office and Section's Performance and Commitment Review (OPCR and SPCR) for Center's performance assessment. The unit also conducts field monitoring and evaluation of projects' activities and accomplishments and periodical Program Implementation Review (PIR).

#### 6. Procurement Management Unit (PMU)

The PMU has the following functions: (a) advertise and/or post the invitation to bid; (b) determine the eligibility of prospective bidders; (c) receive bids; (d) conduct the evaluation of bids; (e) undertake post-qualification proceedings; (f) recommend award of contracts to the Head of the Procuring Entity (HoPE); and (g) the creation of a Technical Working Group from a pool of technical, financial and/or legal experts to assist in the procurement process.

The Unit is also responsible for ensuring that the Procuring Entity abides by the standards set forth by the Republic Act 9184 and its Implementing Rules and Regulation (IRR), and it shall prepare a procurement monitoring report that shall be approved and submitted to the HoPE.

#### 7. Property and Supply Unit (PSU)

The PSU is responsible for efficient delivery of goods and services from suppliers/dealers. The unit ensures proper store keeping of supplies, physical inventory of properties and equipment, distribution of acquired goods and equipment, and disposal of unserviceable and condemned equipment. It is also responsible for the filing and issuance of Requisition and Issue Slip (RIS), Inspection and Custodian Slip (ICS), Property Acknowledgement Receipt (PAR) and Waste Material Report (WMR) for unserviceable and

condemned equipment. It also prepares Purchase Order (PO) based from the approved bidding documents submitted by the Bids and Award Committee (BAC), Inspection and Acceptance Report (IAR) upon delivery of goods and services, and prepares Pre and Post-Evaluation Report for the repairs and maintenance of official vehicles, infrastructures, equipment and machineries of the Center

In addition, Los Baños NCRDPSC-PSU prepares Disbursement Voucher (DV) and supporting documents to facilitate the payment to suppliers/dealers and monitors gate pass of equipment and machineries that will be used outside the Center's premises. It also monitors proper use and store keeping of equipment and machineries in Center's vicinity through borrower's request form and user's logbook.

#### 8. Records Unit

The Records Unit ensures an efficient records management system of the Center by implementing the following: (a) maintaining a good quality procedure for control, identification, filing, access and retrieval, storage, and proper disposition of all records per set standards; (b) designating storage areas and filing cabinets; and (c) having disposal system based on current National Archives of the Philippine's systems and procedures shall be implemented. Furthermore, it receives communication documents from the Central Office and various stakeholders and disseminates it to concerned Sections and Units. It also manages outgoing documents of the Centers and keeps a copy of each received and sent document.

#### 9. Facility Development and Maintenance Unit

This unit of La Granja NCRDPSC is in charge of planning and implementation of development and maintenance of Center's facilities in support to research and seed production.

The Bureau of Plant Industry (BPI) commits to value and satisfy the needs of its interested parties namely customers, stakeholders, oversight agencies, agencies providing statutory benefits to employees, other technical personnel devolved to other government §agencies, product and service providers, consultants, and resource persons and BPI staff/personnel.

The following is a brief and general description of each of these interested parties:

- a. **Customers** are the recipients of the Bureau's products and services. They are farmers, students, importers, exporters, passengers carrying plant products and plant materials, treatment providers, private companies, nursery operators, tissue culture laboratories, plant breeders, seed growers, seed producers, other private individuals, government institutions and non-government organizations.
- b. **Stakeholders** are persons and organizations that can affect, be affected by or be impacted by the products, policies and services offered by the Bureau. This is composed of private institutions, farmer groups or cooperatives, Philippine port and airport authorities, International Organizations, other government institutions, academe and non-government organizations.
- c. **Oversight Agencies** include the Department of Agriculture (DA) to which the BPI is attached, the Department of Budget and Management (DBM), the Commission on Audit (COA), Bureau of Internal Revenue (BIR), the Government Procurement Policy Board (GPPB), the Civil Service Commission (CSC), other oversight agencies.
- d. **Agencies Providing Benefits to Employees** include the Government Service Insurance System (GSIS), the Home Development Mutual Fund/Pag-IBIG Fund (HDMF), and the Philippine Health Insurance Corporation (PhilHealth).
- e. **Other technical personnel devolved to other government agencies** consist of Agricultural Technician, Agricultural Extension Workers, and other employees. They collaborate with BPI and act as frontliners in the provision of service to our customers.
- f. **Product and service providers** include suppliers of goods and services needed for the operations of the Bureau.
- g. **Consultants and Resource Persons** include individuals outsourced by the Bureau to provide the most comprehensive legal and technical expertise.
- h. **BPI staff/personnel** refers to all the individuals employed by the Bureau, whether as permanent or non-permanent personnel.

Director's Office	Endorsement of Exporters for Food Safety Compliance	On-time submission of endorsement letter as a public document	National Plant Quarantine Services Division
Head of Procuring Entity	Procurement Monitoring Report (Public Bidding, Small Value & Shopping)	Consolidate monitoring reports	Bids and Awards Committee
Information and Computer Section	Information, education, and communication (IEC) materials	Submission of inputs for online publication in the BPI website	All Operating Units
National Plant Quarantine Services Division (NPQSD)	Review of SPSIC for GM commodities	Timely review of SPSIC for GM commodities	Biotechnology Office
National Plant Quarantine Services Division (NPQSD)	Approved license to Operate (LTO) for Importers (Proprietors, Corporations, and Hobbyists)	LTO (in accordance to DA DC 4 series of 2016 and DA DC no. 6 Series of 2020)	Director's Office
National Plant Quarantine Services Division (NPQSD)	Sanitary and Phytosanitary Import Clearance (SPSIC), Plant Quarantine Clearance (PQC) and/or PQSC	SPSIC, PQC and/or PQSC (in accordance to DA DC no. 4 series of 2016)	Director's Office
National Plant Quarantine Services Division (NPQSD)	Import Conditions from BPI	Updating of Import Condition through PRA and Market Access (in accordance to WTO)	Director's Office
National Plant Quarantine Services Division (NPQSD)	Memoranda on Movement of Plants, Plant Products, and Planting Materials	Advisories and Updated Memoranda	Director's Office
National Plant Quarantine Services Division (NPQSD)	License to Export Certificate	License to Export Certificate (in accordance to Memorandum 40, series of 2012, DA-DC No. 05 series of 2019, Memorandum Circular No. 01, Series of 2005, Memorandum Order No. 179 Series of 2007, Memorandum order No. 103)	Director's Office

The Bureau of Plant Industry (BPI), through its Procurement Service, ensures that the procurement activities are implemented in a timely manner and the determination of eligibility of external providers/suppliers is within the requirements of the Republic Act 9184 known as "Government Procurement Reform Act" and its Implementing Rules and Regulations. Control of external providers of products and services, facilities and equipment and outsourced processes is done through issuance of contracts, Terms of Reference (TORs), purchase orders and other related documents.

#### A. Purchase of Products and Services
